

16th Conference *Mathematics in Technical and Natural Sciences*

The 16th Conference “Mathematics in Technical and Natural Sciences” will be held from 30th June to 5th July, 2019 in Kościelisko, a suburb of Zakopane, the well-known Polish mountain resort.

Conference topics include achievements in applied mathematics and mathematical physics. The scope of the conference involves, but is not limited to:

- geometry methods and integrable systems;
- modelling of nonlinear phenomena;
- scattering theory and Lax-Phillips scattering approach.
